

Information Needs (Partial List):

- Empirical basis for indication that relatively little allowance value needed for energy-intensive trade-exposed industries
- Allowance value needed to prevent disproportionate impact to lower two quintiles of income distribution
- Allowance value needed to address various specific investment options
- Clarify investment measures called for in Scoping Plan

- Graph with impacts of AB 32 on household real income, absent offsetting transfers

- Range of estimates as to increase in energy prices from AB 32
- Extent of electricity cost pass-throughs; clarify connections with AB 1X, SB 695, and CARE Program
- Clarify sources of regional disparities in current electricity prices

- Potential for electronic financial transfers to households

- Legal:
 - Does dormant Commerce Clause apply to border adjustments?
 - Legal constraints (if any) on free allocation, ability of ARB to run an auction, and on use of stand-alone entity to disburse auction revenue
